

Shivasp industrial group has invented a new technology for the production of solar lighting system which led the company to be the only manufacturer of fixed and portable high power solar floodlight/spotlight tower as well as solar lighting system for highway and street light with supporting more than 10 cloudy days in the world. Based on our know-how, technology, intelligent power management system, manufacturing LED lights which are integrated with our system, our products have following advantages comparing with other solar lighting systems:

- ✓ Increasing the system reliability in terms of the LOLP
- ✓ Significant increase in luminous flux relative to power consumption
- ✓ Reducing costs considerably in terms of innovation of products
- ✓ Durable products compared to those of other competitors
- ✓ Light structural and customer-oriented design
- ✓ Having CE and ISO9001 standards
- ✓ Priceless electricity
- ✓ Without risk of electric shock
- ✓ Turning on and off automatically with ambient light
- ✓ Easy and costless maintenance
- ✓ Water and dust resistant

The solar lighting systems of this company in comparison with products of other competitors have longer lifetime, lower price, and a 10-day support on cloudy days so that products of other similar companies turn off after two or three days at cloudy weather, but in the solar lighting products of this company after seven to ten days lighting intensity decreases. In other words, the LOLP coefficient of the company products is zero.

Shivasp has also designed and manufactured portable solar lighting systems so that customers can easily move the system to their favorite places. Our system can be used in different applications such as highways where 250-400 watts floodlights are required. Our floodlight/spotlight can be installed in all places that high power lights up to 4000 watts needed.
