

The company designs and produces cost-effective and efficient spotlight towers (in comparison with the lighting is produced by diesel generators) of 500, 1500 and 2000 watts to be implemented in different industrial, developmental and construction projects such as: water pipeline repairs, oil and gas, road constructions, damming, mining, excavation and generally all projects in which the electrical grid network is not accessible. Products of the company can be manufactured based on the costumers' need and implemented in any climate making them competitable with the global trusted brands. The solar lighting systems of this company have longer lifetime, lower price and length time of 10-day support on cloudy days (Only 4 to 6 hours per day charging by sunlight required). In other words, the LOLP coefficient of the company products is zero.

Address: Flat No.26 & 27, 4 Floor, Block "B", No46,
Salimi Alley, Dr. All Shariati Ave., Tehran /
